On behalf of the National Authority for the Campaign Against Alcohol and Drug Abuse (NACADA) Board of Directors, it is my great pleasure to welcome you to the first edition of the NACADA Mashinani Newsletter. This is a Quarterly Newsletter whose main objective is to provide a platform for sharing useful information on the campaign against alcohol and drug abuse in the country. The introduction of the newsletter is a demonstration of our commitment to engage all our stakeholders and to open a channel for public discourse in the campaign for a nation free from alcohol and drug abuse.

Recognizing that alcohol and drug abuse affects all sectors of the society, NACADA has adopted a complete paradigm shift by introducing the Mashinani concept as a deliberate effort to reach out to all communities especially at the grassroots. We desire a more collaborative approach by operating more at the community level in the campaign against drug abuse in all our programmatic areas and for more effective outcomes.

NACADA recognizes that alcohol and drug abuse is a big threat to His Excellency the President’s Big Four Agenda and the attainment of Kenya’s Vision 2030. This is because of its direct bearing on universal health and a healthy workforce that is prerequisite for a vibrant manufacturing industry envisaged in the Government’s transformation agenda. We therefore welcome the contribution of every Kenyan and it is our sincere hope that all our partners and stakeholders will join hands in the campaign for nation free from alcohol and drug abuse.

Thank you.
Lt. Col. (Rtd) Julius A. Githiri.
Message from the CEO

On behalf of the Management, I take this opportunity to appreciate all our stakeholders and welcome you to the first edition of our Newsletter - NACADA Mashinani. The idea of starting this Newsletter is driven by the passion to enhance our engagement with the community and all stakeholders as well as mobilize Kenyans of goodwill to make their contribution to the challenge of alcohol and drug abuse in the country.

The surveys conducted by NACADA on the country’s drug abuse situation reveal heightened abuse of alcohol and other substances amongst the general populace (persons aged between 15 and 65 years). We have also conducted surveys on the drug situation in our primary and secondary schools which reveal a worrying trend of high prevalence of alcohol and drug abuse in schools. In the two surveys, the average median age of onset to drug abuse was reported to be 11 years and lowest being 6 years and this is quite worrying. I invite you to visit our website for details of these surveys.

These unacceptable statistics point to a serious alcohol and drug abuse challenge especially among our youth, that must be confronted by all if we have to secure the future of our youth and nation. As the country pays attention to the transformation agenda of the ‘Big Four’, more effort should be directed towards mitigating the negative impact of alcohol and drug abuse because of its nexus to this important national transformation initiative. Universal healthcare and the productive healthy workforce that is critical for industrial growth and food security will be undermined by high the prevalence of alcohol and drug abuse.

The newsletter will provide information on the various initiatives being implemented by NACADA and other partners to address the drug problem in the country. More importantly, the newsletter provides a channel for members of the public to engage with the Authority over their issues of concern and to receive feedback on issues addressed to the Authority.

We invite you to follow, through this newsletter, the various programmes NACADA is implementing to mitigate the consequences of alcohol and drug abuse. Under our public education and advocacy programme, we have conducted several stakeholder forums where we engage the youth, workers, leaders, community and security committees in a conversation about alcohol and drug abuse in their respective counties. The Sauti 47 programme in which we had meetings with over 31,000 youth leaders from 28 Counties is a good example of our public education and advocacy programmes. In response to the drug problem in our schools and institutions of learning, we have rolled out Life Skills Programmes in primary schools to empower pupils with relevant skills in order to avoid initiation into alcohol and drug abuse. We are also implementing public education and advocacy campaigns in work places, families and communities. The objectives of these programmes is to reduce the demand for drugs and to promote a nation free from alcohol and drug abuse.

The newsletter will also provide useful information on treatment and rehabilitation services in the country and our regulatory services through which we inspect and accredit rehabilitation facilities that have relevant requirements for the provision of evidence-based treatment and rehabilitation services. We call on all Kenyans to confirm from our website that the treatment facility that they visit has been duly accredited by the NACADA to avoid being duped by unscrupulous business persons whose interest is money.

NACADA will continue to exercise its mandate to inspect and accredit facilities that meet expected standards in order to ensure that the public have access to quality treatment and support services. Furthermore, NACADA is currently working with ten county governments to establish public-owned treatment and rehabilitation facilities in their respective counties. On this note, I would like to appeal to all county governments to ring-fence funds generated from the devolved licensing function to support programmes that address the growing challenge of alcohol and drug abuse.

To enhance compliance to the laws and regulations governing the alcohol industry, NACADA recognizes that alcohol and drug abuse is a multi-faceted challenge that requires a multi-agency solution and has embraced a multi-agency approach in carrying out intelligence-led inspections to weed out illicit trade in the alcohol and drug industry. In this approach, we have partnered with the State Department of Interior, National Police Service, Kenya Bureau of Standards, Kenya Revenue Authority and the Director of Public Health in the Ministry of Health to carry out several successful crackdowns across the country. We welcome the public to support this initiative by providing information on traders who do not comply with the law. The newsletter will be highlighting some of the non-compliance issues we need information from the public to act.

Moving forward, NACADA seeks to build strong grassroots partnerships with communities and local organizations so as to enable the Authority to implement community-driven prevention and rehabilitation programmes. We invite all Community Based Organizations, Faith Based Organizations and other relevant stakeholders involved in addressing alcohol and drug abuse to partner with us for the benefit of the many Kenyans who require our support.

Thank you,
Victor G. Okioma, EBS.
LifeSkills Prevention Interventions Pilot Programme
Lessons Learnt in 10 Primary Schools in Nyeri and Embu Counties

Background

Life-Skills Training (LST) is a multi-component substance abuse prevention curriculum addressing social, psychological, cognitive, and attitudinal factors that are associated with the use of various legal and illegal psychoactive substances. LST’s primary objective is to enhance the development of basic life skills, personal competence, and skills related to resistance to social influences that promote substance use and abuse, especially amongst young people.

As one of the evidence-based interventions, NACADA undertook to pilot the Botvins Lifeskills Training in 50 schools in the Country. Central Regional office rolled out and completed implementation of the program in 9 primary schools in Nyeri and Embu counties. The schools were sampled and recommended for intervention by the respective County Directors of Education and supported by head teachers. The schools selected were as follows: In Nyeri County (Chaka, Tetu Girls Boarding, Rutune and Karatina DEB), In Embu County (Makutano DEB, Embu Urban, Kirari, Siakago and Kubukubu Boarding). Two teachers from each of the schools were subsequently trained by NACADA on the Life Skills Program and upon doing the Pre-Test in February 2018, the program was rolled out targeting Standard 5 pupils.

The program was delivered in 15 sessions over two terms and all the schools had completed implementation by end of October 2018. Sessions which last an average of 45 minutes were delivered once a week and consisted of three major components: (1) general self-management skills, (2) social skills, and (3) information and skills specifically related to drug use.

A total of 708 pupils underwent the program that was run by the trained teachers and occasional monitoring and support visits by NACADA officers. The scheduling of the Life Skills lesson in the school accorded opportunity for the program to be run without interfering with the school calendar. However, because fidelity of the program demanded 45 minutes while to lesson time in schools is only 35 minutes, the respective teachers became innovative to get more time. Some extended to break time while others would do the lesson in the afternoon and extend during the last lesson.

The following are some of the lessons that were learnt during implementation of the program:

- The teaching of life skills programs weekly over a longer duration is more effective in change of behaviour and attitudes. The design of conducting the lessons once a week provided the pupils adequate time to reflect and practice their skills, while still maintaining motivation and enthusiasm. It is worth noting that most teachers reported that there was marked academic improvement among the pupils as they were more focused and had even set improvement goals.

- There is need build a supportive family and community environment where pupils can exercise their skills. The areas that the pupils come from are rife with alcohol and drug abuse; the alcohol and other drugs are easily accessible and often acceptable. Some pupils would confess that their parents and
other relatives would openly consume the drugs and thus a challenge in confronting them.

- Parents are both role models and primary agents of socialization for their children hence their alcohol use patterns or behaviours are likely to have an impact on their children’s alcohol abuse. It is important to familiarize families and communities with the prevention intervention and to get their buy-in and consent including providing a favorable environment for the pupils to practice their skills and reinforce positive behaviours.

- Routine monitoring and capacity-building is critical for effective delivery. Monitoring was also done by NACADA and the teachers given feedback of areas they were doing well and areas for improvement. The encouragement is also critical as the program is not examinable and requires extra effort from the teacher.

- Support from the school administration in terms of time set and materials support ensured smooth the delivery of the program. The teachers were encouraged to give their best despite the program not being examinable.

- Provision of at most 35 pupils per class to facilitate effective interaction of all pupils during the sessions. Due to large number of pupils in classes, sometimes it would be challenging for all the pupils to actively participate in the sessions. The classroom size also doesn’t provide for enough room for group discussions and exercises and thus the teacher might need to be innovative to conduct some exercises outside the classroom.

- The pilot schools had some children coming from rural set ups. Due to this some pupils could not understand some concepts in the Life skills book that were mainly in English. The teacher had to translate into Kiswahili and sometimes into mother tongue for the pupils to understand.

- The fact that there is already allocated time in the school timetable for Life Skills provides an opportunity to implement this program in many schools. Most schools usually do not have content and thus would often use this time to catch up on other subjects. While delivering the Botvin Life Skills Program other teachers noticed its effectiveness and would sometimes borrow some of the knowledge to the students in other classes.

### Challenges

1. There was a general consensus that the LST program was a noble one, highly comprehensive and one that was bound to have more positive impacts if implemented well; but not without a few exceptions. For instance, some teachers felt that the concept was little bit too technical for class 5 pupils and too demanding for teachers, given the restricted methodologies for its delivery and fidelity.

2. Teachers also expressed concern that since LST was not an examinable subject and some teachers would confess that they were admonished to put more effort on examinable subjects.

3. There was also a generalised feeling amongst the LST teachers that the language (English) used in the LST was technical for the level of pupils in rural schools, whose main language of communication is Swahili.

4. The huge number of pupils taking the LST program per class in some schools was also raised as a serious issue of concern, given the fidelity principles that are required to implement LST in schools.

5. Interruption of the program by other school activities such as exams, midterm break and sporting activities.

### Recommendations

#### For Schools

- School administrations need to allocate more class time for this noble project and support it fervently.

- Teachers to device internal ways to gauge effectiveness of the program amongst pupils to ensure more positive outcomes.

- Schools should develop and implement policies on ADA to heighten school-based ADA interventions.

#### For NACADA

- NACADA should consider training more LST teachers (at least two per school)

- There is need to hold forums with key stakeholders (LST teachers, School Administrators, NACADA, UNODC, Botvin LST Trainers, etc.) to harmonise and customise LST learning materials into local contents.

- There is need to ensure that enough pupils guides/manuals are supplied to all schools to enable efficiency.

### For The Ministry of Education (MoE)

- Going forward, the Ministry of Education should support the program intensely and fund it adequately for it to be more impactful.

- MOE in close collaboration with NACADA to conduct regular M&E visits to participating schools, this is to show their support for the program.

- The MOE should strive to ensure the LST concept is cascaded to every school for adoption and as a matter of policy.

- The Ministry of Education should appreciate and reward teachers engaging in the LST program in schools.

One of the teachers from Tetu Girls Primary School did a presentation on the lessons learnt from the program during the NACADA-ISSUP International Conference on drug demand reduction on 13th December, 2018 at KICC Nairobi.

### Conclusion

Life Skills Program greatly contributes to children developing skills that not only prevent them from substance use but also general coping skills that is critical to their achievement of success. Life skills are integral part of day-to-day running and thus should be integrated in the school program across board. Finally, to ensure even better quality of service provision and teachers should be supported with refresher trainings to sharpen their skills.
In December 10-14, 2018, the Ministry of Interior and Coordination of National Government under the leadership of NACADA partnered with the African Union and International Society of Substance Use Professionals (ISSUP) in undertaking the first ever International Conference on drug demand reduction in Africa. Held at the Kenyatta International Convention Centre (KICC) the five-day conference brought together partners from over 80 countries worldwide. The conference provided an opportunity for sharing experiences and best practices which can be customized to address local challenges in prevention and advocacy; policy, legal and enforcement; research and training; and treatment and rehabilitation of Substance Use Disorders. engage with leading experts in the diverse field of drugs and substance abuse prevention, treatment and aftercare.

OPENING CEREMONY: Dr. Fred Matiang’i, CS Ministry of Interior & Coordination of National Government - ‘Kenya Remains Resolute in fighting drug and substance abuse and its networks. Since the government cannot work in isolation, we will work across all sectors and upholding partnerships and collaborations that we are signatories to.’

Ms. Kirsten Madsen, Assistant Secretary U.S. Department of State’s Bureau of International Narcotics and Law Enforcement Affairs (INL) delivering her speech during the official opening ceremony of the conference.
GLOBAL PARTICIPATION - Delegates from over 84 countries attended the first ever ISSUP Drug Demand Conference to be held in Africa and the fourth to be held globally.

FROM LEFT: NACADA Director Ms. Farida Rashid, Board Vice Chair Ms. Margaret Moitalel and Director George Ogalo during the conference in Nairobi.

FROM LEFT: NACADA- ISSUP INTERNATIONAL DRUG DEMAND REDUCTION CONFERENCE 2018

FROM RIGHT: Dr. Gilberto Gerra, Chief Drug Prevention & Health Branch, UNODC with NACADA CEO, Mr. Victor Okioma

FROM LEFT: ISSUP-Kenya President Evans Olao, Nunga Sengametsi from Malawi, Grace Duka-Pante from the Phillipines and Dr. Richard Gakunju from MASAA & Patron, ISSUP-Kenya.

The first ISSUP conference was held in Bangkok, Thailand (2015), the second was in Campinas Brazil (2016) while the third was in Cancun Mexico in 2017.
ISSUP Youth Forum

The Youth Forum sampled two projects from a myriad of community-focused projects they worked on with over the last five days of the conference.

The UNODC Youth Declaration Statement on stepping up action for effective interventions to reduce substance use harm and demand in Africa.

Youth from various organizations listening attentively during a session at the Conference.
NACADA Board of Directors underwent a training on Effective Leadership Communication to equip it with critical capacity to spearhead the development of a robust Communication Strategy for the organization.

Led by the Chairman, Lt. Col. (Rtd.) Julius Ayub Githiri, the training was held at the Travelers Beach Hotel, Mombasa from December 3rd to 4th 2018 and facilitated by Peterson Communications Limited.

This training was meant to equip the Board with knowledge on how best to engage with partners and stakeholders at the grassroots (mashinani). The communication strategy will also identify gaps in the Authority’s communication with various stakeholders and recommend improvement so as to enhance engagement with communities and other stakeholders.

NACADA has a rich repository of information and data from its surveys and programmatic initiatives that, if shared, will go a long way in empowering communities in making their contribution in the campaign against alcohol and drug abuse and in supporting persons suffering from Substance Use Disorders to lead better, healthier lives.

The training also included a press briefing where NACADA CEO, Victor Okioma called on all stakeholders to join hands in this fight through partnerships so that our country can be free from all negative effects of drugs and other substances of abuse. He appealed to the media to partner with the Authority in the campaign so as to articulate the concerns on drugs and substance abuse to wananchi.

FOR THE LAST TWO YEARS, WE HAVE REALLY GROWN AS AN ORGANIZATION. THERE IS INCREASED VISIBILITY AND WE COMMEND YOU ALL FOR IT. I BELIEVE GOD IS TAKING US TO A BETTER PLACE IF WE TRUST IN THE LORD. WE WILL WALK THE JOURNEY TOGETHER.

Vice Chair of the Board, Madame Margaret Moitalel

WHEN THE YEAR BEGINS, WE HOPE THAT YOU WILL BE RE-ENERGIZED TO UNDERTAKE GOD’S AGENDA OF SAVING LIVES. WE ALL HAVE PEOPLE WHO ARE AFFECTED BY THE DRUG AND SUBSTANCE ABUSE PROBLEM. GOD HAS GIVEN US THIS UNIQUE OPPORTUNITY TO SERVE THE PEOPLE.

Chair, Board Finance Committee, Mr. George Ogalo

REDEMING PEOPLE LIVES IS NOT AN EASY JOB. IT IS CONTINUOUS, AND WE ARE ALL PART OF THAT MISSION. OUR JOB IS UNIQUE, AND YES, WE ARE ON A MISSION.

Board Audit Committee Member, Mr. Peterson Mwai

MADAME FARIDA RASHID SAID, OGW

The Board of Directors, CEO and Staff of NACADA congratulate Board Director Madame Farida Rashid who was conferred the Order of the Golden Warrior (OGW) by HE President Uhuru Kenyatta during the 58th Jamhuri Day Celebrations on 12th December, 2018 at Nyayo Stadium. This was in recognition of her tireless efforts in drug abuse programmes at the Coast region.

Madame Farida is a renowned Coast Anti-drugs Activist for the last two decades. She is also the Chairlady of Kenya Muslim Women Alliance and has previously served as a Treasurer of Maendeleo ya Wanawake (Coast region). Currently, she heads the Coast Community Anti-Drug Coalition.
The Mombasa County Stakeholders Forum

Over the years, Mombasa and Coastal region has been identified as a hot-spot as far as hard drugs use and abuse is concerned. Findings from a March 2016 baseline survey which sought to establish the current use and abuse of drugs and other substances of abuse at the Coast region revealed that Mombasa County leads in terms of current use of at least one substance of abuse at 34.4 percent.

The Coast Survey recommended that the county governments with the support of NACADA, undertake elaborate public education and advocacy campaigns aimed at sensitizing the communities and families about the dangers of drugs and substance abuse.

A major stakeholders’ forum was held at The Kenya School of Government, Mombasa on Tuesday April 17, 2018 from 9.00am to 1.00pm with the objective of sensitizing key stakeholders on Alcohol and Drug Abuse intervention programmes with a focus on demand reduction and supply suppression. The forum also sought to initiate sustainable prevention and control strategies in the county.

The forum comprised of leaders from the county government, regional and county commissioners, youth, women, opinion and religious leaders as well as those from Civil Society Organizations (CSOs) and Non-Governmental Organizations (NGOs).

“"We have abdicated our responsibilities as parents. There is need for parents to be equipped with basic skills of early detection of drugs and substance abuse in their children.""

Mr. Victor Okioma, CEO, NACADA

During the event, NACADA CEO, Mr. Victor Okioma stated that drugs, illicit liquor and alcohol abuse were the greatest enemies of the country’s development. Recognizing that the fight against drugs and alcohol abuse cannot be won by NACADA alone, he said that the Authority came to listen to Mombasa leaders so that together, we can come up with ways of how to deal with challenges of drugs and alcohol abuse in the county.

He affirmed the government’s commitment to achieve HE President Uhuru Kenyatta’s Big Four Agenda of universal healthcare for all, food security, affordable housing and manufacturing.

He challenged all present to play their part in the campaign. There is no way we can achieve the President’s Big Four Agenda if Kenyans are dying from alcohol and drug abuse complications.

Key Points Raised During The Forum

• As a country we have a challenge of alcohol and drug abuse
• NACADA is keen to seek opinions of the community and key stakeholders on what to do about the problem. All stakeholders including religious leaders have been invited to be part of the solution for Mombasa.
• Licensing has been devolved to the counties, and with it, a myriad of

continued on page 9
challenges has been witnessed:

• Since the devolution, consideration of revenue has taken over from the consideration of public health and concerns of the wananchi.
• The wananchi have a say in how many if at all bars can be run in an area.
• As a country, we will not progress if we don’t deal with the issue of alcohol and drug abuse.
• The Mombasa county leaders were challenged to choose between drugs and development of their region.
• For the strategies to be effective, both the county and national government can work together to deal with the challenge of drug and substance abuse.
• It was observed that there is an emerging problem of muguka and drugs especially among the youth and young adults.
• Prevention of drugs and substance use and abuse is the best way of dealing with this scourge.
• The current situation in Mombasa county is that 50 percent of school-going children use drugs.
• There is a dire need to sensitize parents and all stakeholders with knowledge of prevention interventions.
• All interventions must be evidence-based to be effective.
• The challenge of Mombasa is not one person’s challenge, but for the whole community.
• We have come together including all stakeholders to chart a way forward in the fight against drug and substance abuse at the Coast region.

Agencies Represented:

• Mombasa County Department of Health
• Youth Fund
• Anti-Counterfeit Agency
• Kenya Bureau of Standards (KEBS)
• Stretcher Youth Organization
• Treatment centres such as Reachout
• MEWA
• National Aids Control Council (NACC)
• Mombasa County Inspectorate
• Religious leaders
• Media fraternity
• Ministry of Devolution
• Community members

1192, NACADA’s 24-Hour Free Helpline Service

NACADA operates a national 24-hour Helpline service 1192 to assist persons suffering from Substance Use Disorders and their families to access psychosocial support and referral services. This service is offered free of charge, 24 hours a day, every day.

Derived from the NACADA Act, 2012, this is part of its core function in providing and facilitating the development and operation of rehabilitation facilities, programmes and standards for persons suffering from Substance Use Disorders.

Many people affected by Substance Use Disorders continue to suffer in silence owing to the stigma associated with addiction, denial, and their apparent lack of information on alcohol and drug abuse and possible interventions. The free helpline service offers confidential, real-time assistance through telephone counseling and referrals to those affected in one way or the other with Substance Use Disorders.

There is growing need to enhance drug demand reduction through psychosocial support, treatment and rehabilitation.

Specific Objectives of the Free 24-Hour Helpline:

• To provide adequate information on alcohol and drug abuse to the public;
• To provide basic counseling to persons abusing alcohol and other drugs and their affected families;
• To provide informed referrals to treatment or counseling centers for personalized attention to persons abusing alcohol or drugs;
• To obtain relevant data on alcohol and drug abuse;
• To inform community-based interventions.

Number of Clients served to date

Since its launch on 1st April 2010, the helpline has served over 400,000 clients to date. Trained professional Helpline Counselors provide adequate information on alcohol and drug abuse; offer basic counseling to persons abusing alcohol and other drugs and their affected families and also give informed referrals to treatment or counseling centres for personalized attention to persons abusing alcohol or drugs who can call in day or night.

Useful information on The National Standards for Treatment and Rehabilitation of Persons with Substance Use Disorders, National Standards for Treatment and Rehabilitation of Persons with Substance Use Disorders, Abridged Version and Checklist can be found on NACADA website via http://nacada.go.ke/?page_id=881
NACADA MASHINANI

TARGET GROUP
MUST BE

Universal Prevention Curriculum (UPC)

NACADA organizes clustered training programmes tailored to meet the needs of workers, families and pupils in learning institutions with the overall goal of reducing the health, social and economic problems associated with substance use and abuse by building prevention capacity using effective evidence-based preventive interventions and strategies.

<table>
<thead>
<tr>
<th>PROGRAMME</th>
<th>DESCRIPTION</th>

Universal Treatment Curriculum (UTC)

Basic Universal Treatment Curriculum Training Program for Addiction Professionals

The Authority is mandated to provide and facilitate the development and operation of rehabilitation facilities, programs and standards for persons suffering from substance use disorders. Certification of addiction professionals is one step in that direction. The objective is to ensure quality treatment and rehabilitation to persons with substance use disorders by certifying addiction professionals.

To ensure that the Addiction Professionals acquire set competencies and skills thereby comply with the National Standards for Treatment and Rehabilitation of Persons with Substance Use Disorders, the Counseling and Treatment Unit undertakes the following.

- Capacity-building and certification of addiction professionals training on certification, support groups, Alcoholics Anonymous, Narcotics Anonymous and Recovery Coaching
- Provides and facilitates implementation of Treatment and Rehabilitation facilities and Implementation of National Standards for Persons with Substance Use Disorders
- Carry out outreach programmes which entail sensitization on the effects of drugs and other substances of abuse (Inspections)
- Inspection of Treatment and Rehabilitation facilities to assess adherence to the National Standards or Persons with Substance Use Disorders. (Entails the facilities and the practice) Structure, Operations Policies

Registration of participants will be on first come basis and MUST BE ACCOMPANIED BY PAYMENT. Registration Deadline is 3 weeks before the beginning of each training.

NB: Use the prescribed training booking form accessed through our website www.nacada.go.ke. Please return complete form by email via training@nacada.go.ke Contact 0739-581268.

* We can also organize training for special groups in churches, residence associations and non-governmental organizations and other formal groups based on request.
National Alcohol and Drug Abuse Policies

Which way NACADA?

As part of the Government’s commitment to address the effects of alcohol and drug abuse, NACADA initiated the process of reviewing various existing policies on alcohol and drug abuse in Kenya with a view to harmonize and develop an overarching policy for the country.

As part of the process, a 5-day workshop to harmonize the current draft policies on the management of alcohol, drugs and other substances of abuse was held at Mombasa Beach Hotel from February 12-16, 2018. Under the auspices of the National Technical Committee, stakeholders who participated in the workshop included the Anti-Counterfeit Agency, Kenya Revenue Authority, Ministry of Public Health, The Attorney General’s Office and the National Intelligence Service (NIS).

The need to review and harmonize these policies was borne out of the realization that the current socio-economic, legal, cultural and political environment has significantly changed.

It was acknowledged that the existence of numerous policies which all speak to the challenges of alcohol, drugs and other substances of abuse was confusing. Hence the need to consolidate all these policies into one harmonized over-arching policy that is also aligned to International and Regional drug control protocols and conventions, the Constitution of Kenya and the nation’s development blueprint, Vision 2030.

Policies under review

- National Alcohol Policy
- Narcotic Drugs and Psychotropic Substances Control Policy
- National Drug Control Policy
- National Treatment and Rehabilitation Policy 2013
- Policy for Accreditation of Training Institutions, 2013

Development of a holistic umbrella policy on alcohol, drugs and other substances of abuse for Kenya underway

It is important to note that strategies such as harm reduction is an emerging issue that needed interrogation; as well as Prevention Science on alcohol, drugs and other substances of abuse is gaining traction worldwide. The onset of the new Constitution of Kenya, 2010 and the establishment of county governments are critical issues to consider.

Stakeholders at a town hall meeting in Mombasa during a Community engagement forum

Status

As part of stakeholder input on the zero draft, the Authority held a series of consultative forums at the national and regional levels with key state and non-state actors working in the field of Alcohol and Drug Abuse prevention, treatment and control. Inputs from their wealth of experience was sought so as to enrich the document.

1. Mombasa County consultative forum - This forum took place on 17th October 2018 at the county commissioner’s boardroom.
2. Machakos County consultative forum - This forum took place on 19th October 2018 at the County Youth Centre.
3. Nyeri County consultative forum - This forum took place on 22nd October 2018 at the Westwood hotel.
4. Uasin Gishu County consultative forum - This forum took place on 24th October 2018 at the county commissioner’s boardroom.
5. Kisumu County consultative forum - This forum took place on 26th October 2018 at the Regional commissioner’s boardroom.

Recommendations made during these forums have since been incorporated into the document.
Research

Did you know that between the ages 13 and 15 years, students in secondary schools are most likely to start using drugs and other substances of abuse?

Did you also know that currently, there is a disturbing emerging preference of abusing prescription drugs among students in secondary schools in Kenya? And that the three top drugs and substances of abuse most readily available to students in schools are cigarettes, alcohol and khat?

These and other findings are just a tip of what ails our society as far as alcohol, drugs and other substances of abuse. One of NACADA’s core mandates is to collaborate with other public and private agencies to facilitate, conduct, promote and coordinate research and dissemination of findings on data on alcohol and drug abuse; as well as serve as the repository of such data. To get the most of such findings and access more research and recommendations in the field of drug and substance abuse, visit http://nacada.go.ke/?page_id=387#

Alcohol and Drug Abuse Studies

1. Assessment of Knowledge, Attitudes and Use of Drugs and Substances of Abuse among Primary School Pupils in Kenya, 2018
2. Rapid Situation Assessment of the Status of Drug and Substance Abuse in Kenya, 2017
11. Exploratory Survey on the Use of Narcotic Drugs in the Production of Confectioneries in Kenya, 2014
12. Survey to Determine the Level of Alcoholic Drinks Consumption and Related Deaths in the Country, 2013
15. Alcohol, Drugs and Substance Abuse among Persons with Disability in Nairobi, Coast and Central Regions in Kenya, 2012
19. Effectiveness of Community Based Interventions to Mitigate Harmful Alcohol Use in Murang’a East District, 2012

Funded PHD/ MA Research Studies

NACADA endeavours to increase knowledge and support scholarship on diverse subjects relating to alcohol, drugs and other substances of abuse. NACADA fully funded PhD and MA Research studies in previous financial years. A summary of these researches is outlined below.

A 100-day Rapid Results Initiative (RRI) exercise was launched by the Cabinet Secretary of the Ministry of Interior and Coordination of National Government, Dr. Fred Matiang’i on March 1st, 2018 at Kenya School of Government, Nairobi.

Coordinated by NACADA, a multi-agency team comprising of officials from the Ministry of Interior and Coordination of National Government, NACADA, Kenya Bureau of Standards (KEBS), Kenya Revenue Authority (KRA), Anti-Counterfeit Agency (ACA) and Public Health led a country-wide crackdown on premises selling alcoholic beverages.

The main objective of the initiative was to ensure compliance with the laws and regulations relating to the manufacture, sale and consumption of alcoholic beverages with a view to protecting the health and wellbeing of the people of Kenya.

A total of 8,833 premises in 44 counties comprising of Nairobi, Baringo, Bungoma, Busia, Elgeyo Marakwet, Embu, Kajiado, Kakamega, Kiambu, Kilifi, Kirinyaga, Kisii, Kisumu, Kware, Lamu, Machakos, Meru, Migori, Mombasa, Murang’a, Nakuru, Nyamira, Nyandarua, Nyeri, Taita Taveta, and Uasin Gishu were inspected during the crackdown. The highest number of inspections were conducted in Nairobi County at 3,725 premises and the lowest was Lamu County with only 14 premises being inspected.

Findings from the Inspection exercise

Weak Licensing Regime

Under the Constitution of Kenya, 2010, licensing of alcoholic drinks premises and facilities was devolved to the counties with NACADA as the national body left with ensuring compliance to the polices and laws governing the sector. The inspections revealed the following:

Invalidity of Operating Licenses

Out of the 8,833 premises inspected, 3,164 did not have valid operating licenses.

County Alcoholic Drinks Laws

Across the board, it was observed that County Alcoholic Drinks Licensing Committees were not operational and licensing was left to one person/unit. In addition, a number of premises do not have alcohol control laws.

Delays in issuance of licenses by the County Governments

Some counties were yet to issue the traders with licenses as late as June, 2018 despite traders having paid for the licenses.

Ongoing court cases against the county governments e.g. in Kiambu County.

No licensing had been carried out and was subject to determination by the court. This meant that bars and other alcohol-selling outlets continue to flout the County Alcoholic Drinks Act without any sanctions imposed on them.

Inappropriate licenses

There was a lot of abuse of the Bar and Restaurant License as this allowed sale of alcohol throughout the day as long as a patron was having meal. Majority of premises with this type of license did not qualify as they lacked functional restaurants. This greatly encouraged the consumption of alcoholic drinks throughout the day and night.

Multiple Licenses

There were instances where a premise was issued with general retail alcoholic drink license and a night club license. With these two licenses, premises were permitted to operate throughout the day and night.

One license serving several premises

Some outlets owned by one proprietor/company used only one license for all the outlets. This was contrary to Section 17 (2) of the Alcoholic Drinks Control Act read...
together with the relevant County Law which provides that no license may be granted so as to be applicable to more than one premise.

Inadequate involvement of National Government agencies during licensing. National Government Officials were not involved in the licensing process thereby creating gaps.

Little or no inspections carried out before or after issuance of licenses by the county governments thus encouraging non-compliance.

There was minimal community involvement during the licensing process. Communities were largely unaware that they could raise objections regarding the licensing of any premise if such a premise does not advance public interest.

Conflict of Interest Some premises are owned by law enforcement officers or by senior officials in national and county governments, thereby constraining the teams from arresting attendants for fear of victimization.

Sale of Shisha: The Teams observed the continued sale of shisha despite its ban by the Ministry of Health in December 2017. The sale of Shisha was most common in Nairobi and Mombasa and proprietors were observed to open the Shisha market in the wee hours of night when there was no likelihood of inspection/enforcement.

Concentration of Alcoholic Outlets

The RRI teams observed the concentration of alcoholic drinks outlets in particular areas including bus parks and matatu terminals which suggested the use of alcohol by drivers operating buses/matatus.

Smuggling in Boarder Counties

The smuggling of illicit and counterfeit brews and alcohol is rampant at the border counties. There is need for regular surveillance in these counties such as Migori and Homabay where there were major seizures.

What should residents do?

The Alcoholic Drinks Control Act, 2010 empowers residents to have a say in how many bars or alcoholic drinks selling outlets they want in their locality. Through their respective County Alcoholic Drinks Licensing Committees, they can petition for non-renewal or revocation of licenses of these outlets to reduce the number and enforce compliance to the various laws and policies governing the alcoholic beverages sector.

In December 2017, Cabinet Secretary in the Ministry of Health, Dr. Cleopha Maillu banned the sale and importation of shisha through Legal Notice No. 188 of 28th December, 2017 bringing a huge sigh of relief to wananchi who had witnessed an upsurge of shisha dens even in estates.

Following the ban, there was hue and cry from shisha business people to the extent that they moved to court seeking lifting of the ban. Their efforts were fruitless, prompting government agencies tasked with enforcing compliance to the ban to carry out ad hoc crackdowns of premises suspected to be selling shisha.

NACADA in collaboration with other government agencies carried out crackdowns of suspected premises selling shisha and seized 382 gambling machines boxes, 180 shisha apparatus plus 5 bags of shisha. On 7th January 2018, a security baraza called by the Nairobi Regional Commissioner Mr. Ndirangu oversaw the destruction of the seized items at Babadogo grounds, Ruaraka, Nairobi.

The Director of Compliance, Mr. Joel Cherop (right) addressed the gathering and reiterated NACADA’s commitment to the cause and affirmed the need for a multi-agency approach to address the issues of enforcement and compliance to the laws governing the alcoholic beverages industry as well as banned substances such as shisha.

In his address, he stated that alcohol abuse and illicit brews greatly contributes to crime and there is a need to join hands in addressing the vice. Other issues addressed during the baraza were the current craze and addiction by youth to gambling and the negative effects it is having to the society at large. He lauded the Nyumba Kumi Committees efforts in peacebuilding, community policing and information dissemination.
IT’S ALL ABOUT TEAMWORK!

Teambuilding and Staff End of Year Luncheon - December 17 to 19, 2018

Every year, the Authority endeavours to hold at least one end of year get-together where Members of the Board and NACADA staff sit together, share a meal and reminisce about the successes, challenges and way forward for the Authority.

This year, a memorable end of year Staff Luncheon was held at Utalii Hotel, Nairobi on December 19, 2018. Organized by the Human Resource Division, over 80 staff attended the event. Prior to the luncheon, staff participated in a team-building retreat from December 17th to 19th 2018 at Kyaka Hotel, Machakos County.

As a matter of course, staff were addressed by the Chairman, CEO as well as all Board Members present.

In his remarks, the Chief Executive Officer, Victor Okioma thanked the Board for their direction and leadership. He reiterated that despite the fact that the Authority faced challenges in this financial year due to budget cuts, he was pleased with the support and visionary leadership provided by the Board.

The CEO appreciated staff efforts during the year and affirmed that for any organization to succeed, the first priority is in having a team. You are useful and important wherever you are because it is the sum total of our individual objectives that contributes towards the main objectives of the organization.

He was particularly pleased with staff efforts that resulted in the very successful international ISSUP drug demand reduction conference. NACADA received lots of commendations from local and international partners such as the US Embassy, African Union, Colombo Plan, IUCDDR among others.

In conclusion, he stated that as a result of the success of the international conference, NACADA has greatly improved the country’s stature in organizing international drug demand reduction conferences.

Trust is a crucial element in building effective teams

The first priority of a manager is to create a team. Team effort is the sum total of individual initiatives and actions all working towards a common vision and goal. We must therefore all pull together to respond to the drug and substance abuse issues in our communities.

Chief Executive Officer, Mr. Victor Okioma
Anything that you learn that does not cause transformation is wasted. Moving forward, it should trigger a change to improve how we deliver on our mandate.

Chief Executive Officer, Mr. Victor Okioma
JOMEC also known as the John Mututho Empowerment Center is located in Nakuru County, Kenya. JOMEC is one of NACADA accredited treatment and rehabilitation facilities where a combination of psychological, medical, pharmaceutical, nutritional, alternative and spiritual practices are used to assist clients suffering from Substance Use Disorders achieve recovery.

Covering an area of 10 acres, the facilities comprise of a playground, dining hall/ cafeteria, dormitories, nursing block, pharmacy, meeting hall and several classes.

To contact the Centre, call 0774514 635 or email jomeccenter@gmail.com

Point to Note: Every two years, NACADA inspects treatment and rehabilitation facilities for compliance to the National Standards for Treatment and Rehabilitation Centers as part of its core mandate. JOMEC is among 65 rehabs accredited by NACADA in February 2018. The inspection process is continuous, and proprietors of rehabs are encouraged to contact NACADA for more information on their accreditation status via email info@nacada.go.ke or through NACADA toll-free helpline service 1192, 24 hours a day, every day.

CPA Patrick Obura is the Director Corporate Services where he is in charge of Finance, Accounts, ICT, Human Resources & Administration as well as Corporate Communications

Mr. Obura brings a wealth of experience of over 14 years in Financial Management, Internal & External Auditing, Risk Management, Tax Consultancy and Compliance Management.

Prior to Joining NACADA, he was the Senior Manager Audit & Risk at the Institute of Certified Public Accountants of Kenya (ICPAK). CPA Patrick Obura also worked with the National AIDS Control Council (NACC) as the Head of Internal Audit before joining ICPAK in 2014.

CPA Patrick Obura holds a Master of Business Administration (Finance Option) and a Bachelor of Arts degree all from the University of Nairobi. He is also Certified Public Accountant of Kenya and a member of the Institute of Internal Auditors Kenya.

Mr. Joel Cherop, Director Compliance, Quality Control & Risk Management

District Commissioner, Mr. Cherop was seconded by the Ministry of Interior and Coordination of National Government to join the Authority in December, 2018. The Board of Directors, CEO and staff of NACADA wish Mr. Cherop all the best as he takes up his responsibilities.

The main functions of the Compliance and Quality Control Directorate are to oversee information gathering and intelligence sharing in matters relating to alcohol and drug abuse (ADA) in all regions of the country in collaboration with other lead agencies as well as to carry out surveillance, monitor, evaluate policies and performance of rehab centers. The Directorate is also charged with reviewing and continuously improving the Authority’s Quality Assurance Policies.
NACADA was established under an Act of Parliament in July 2012 when former President Mwai Kibaki assented to the National Authority for the Campaign Against Alcohol and Drug Abuse Act, 2012. The history of NACADA is summarized below.

### Year | Milestone
---|---
1996 | The Inter-Ministerial Drugs Coordinating Committee was constituted and chaired by the Solicitor General while the Attorney General’s office provided the Secretariat.
April 2001 | The National Agency for the Campaign Against Drug Abuse (NACADA) was formed through a Gazette Notice with the primary function of initiating a public education and awareness campaign against drug abuse especially among youth in schools and other learning institutions. This was in response to a wave of violent student unrest and suspicion of devil worship, part of which was blamed on drug abuse.
May 2006 | HE the President established an Advisory Board and appointed its Chairman through Kenya Gazette Notice No. 3749 of 19th May 2006.
2007 | Through Legal Notice No. 140 published in the Kenya Gazette Supplement No. 70 of 29th June 2007, the Agency was transformed into the National Campaign Against Drug Abuse Authority (NACADA Authority) under the State Corporations Act (Cap 446 of the Laws of Kenya). It was placed in the Office of the President under the Ministry of State for Provincial Administration & Internal Security. The 2007 mandate enabled NACADA to coordinate a multi-sectoral campaign to prevent, control and mitigate the impacts of alcohol and drug abuse in the country.
August 2010 | The Authority’s mandate was expanded to include facilitating implementation of the Alcoholic Drinks Control Act, 2010.
